## DESIGN.

Our designs often include so much more than kitchen cabinets. For some, fitting out a new kitchen can be a little daunting with so much to consider. You may need building work, decoration, colour schemes, floor finishes, under floor heating and new lighting. These are all things we can help with as part of our free and friendly service.

## YOUR KITCHEN.

Having a new kitchen is exciting, a chance to think about designs, finishes and features to create the kitchen you've always wanted. A time for ideas and inspiration to design a space that includes all the elements that really matter to you.

## PERFECTLY TAILORED.

Many of the kitchens in our gallery feature subtle soft curves to make an elegant breakfront to cabinet runs, sink units, range cooker housings, larders and fridge freezers. This is just one of the many options you can select to create a look that's perfect for you.

## CHOICE.

You may want a larder, an island, dresser, breakfast bar, wine cooler or boiling hot tap? What about colours, finishes, worktops and handles? A range cooker or built in oven with separate hob? A butler or under mounted sink? Integrated or free standing appliances? These are just a few of the many options we will work through to help you decide what's best for your lifestyle, space and budget.

## QUALITY.

Our cabinets are made from quality materials, solidly constructed by skilled craftsmen using traditional methods and the latest CNC machining technology.

Each kitchen is beautifully hand painted in a tough satin eggshell finish to your choice of colour from the Fired Earth palette.
